Product Use

Single-Use Earplug

Features & Benefits

Feature

PATENTED NO-ROLL DESIGN Insertion is fast and easy, delivering instant protection upon proper insertion. **SOUND MANAGEMENT** Uniform attenuation profile blocks loud noise while voice and other higher frequencies can be heard more naturally. **SMALLER DIAMETER** Eliminates that “plugged up” feeling in your ear canal. **SMOOTH OUTER SKIN** Thermoplastic Elastomer (TPE) material is a great match for the sensitive skin inside your ear canal, delivers long-term comfort.

Benefit

We made the diameter smaller, but packed in more innovation. The result is the patented Matrix, a triumph of hearing protection technology. It promises enhanced communication, safety and compliance. And forget rolling forever. Insertion is fast, and protection is instant upon proper insertion. A revolutionary, super-soft outer skin ensures comfort, and low-pressure foam does away with that plugged-up feeling. Plus, Matrix’s uniform attenuation blocks harmful noise while voice frequencies can be heard more naturally, combating worker isolation and overprotection on the job.

Additional Information

User Manual

Instruction Manual - Matrix (global)

Maintenance

Life Cycle

These plugs must be disposed of and replaced after each wearing.

Storage Information

All earplugs should be stored before and between usages in a way that protects them from dirt, grease, and other contaminants.

Care Instructions

Disposable earplugs are made of either TPE (Thermoplastic elastomers) or polyurethane foam. Washing and cleaning of disposable earplugs are not recommended. These plugs must be disposed of and replaced after each wearing. Excessive moisture reduces the attenuation and slows down the foam recovery which may lead to improper fit.
