

PRODUCT NUMBER: 897

Butoject 897

Butoject® 897 is a highly flexible glove made of butyl rubber. This chemical protective glove offers excellent protection, yet is only 0.47 mm thick. It features a specially roughened surface, to improve the grip on smooth and wet parts. With an overall length of 360 mm, it also protects most of the forearm. The slim fit offers high dexterity for performing very fine tasks. This glove is very frequently used in laboratories due to its excellent protection against a wide range of chemicals, and fulfills the requirements of the new standard EN 16350:2014-07 for protective gloves against electrostatic hazards.
