## Maintenance

**Life Cycle**

We advise that the footwear should be used in the limit of 3 years following the manufacturing date, which figures on the footwear.

After this time limit, certain factors such as: exposure to sunlight, hydrometry, temperature changes, could cause a modification in the structure of the material, which would no longer maintain the same performance levels with regards to the requirements defined in the European Directive 89.686 CEE

**Storage Information**

Footwear should be stored in their original packaging, kept in a controlled stock area, not subject to rapid changes in temperature or humidity levels.

**Care Instructions**

After use leave your footwear to dry in an aired place away from heat. Remove any excess dust or dirt with a brush. Remove any marks using a damp cloth and soap if necessary.

I Finally polish any grain or pigmented leathers using a commercially available shoe care product
